Volunteer opportunity: undergraduate research assistant

Faculty supervisor:
Dr. Ron Walcott, Professor of Plant Pathology, Associate dean of graduate school.

Graduate student supervisor: Mei Zhao, 3rd year PhD student, Rm 4307, Miller Plant Science, mzhao@uga.edu.

Qualification: Enthusiasm about research is a must!

Research area: basic and applied aspects of bacterial fruit blotch of cucurbits, caused by Acidovorax citrulli.

Benefits:
• Fun.
• Learn critical research skills.
  (e.g., microbiology lab work, greenhouse work, and statistical analysis).
• Potential to develop your own research projects.
• Opportunity to participate in all aspects of research from research design to dissemination of results.
• Network with faculty and graduate students.

Facebook page: UGA Seed Pathology Lab.

How to Apply:
If you're interested in volunteering as a research assistant, please contact Mei Zhao (mzhao@uga.edu).
